Part III DETAILED ACTION

1. This Office action is in response to the amendment filed on 6/28/07. Claims 1-14 are being allowed over the prior art of record. Prosecution on the merits is closed in this application.

2. The following is an examiner's statement of reasons for allowance:

The prior art of record teaches different ways of printing variable data and static data, but the prior art of record does not disclose, teach, or suggest the claimed limitations of (in combination with all other features in the claims), a computer implemented method for generating a bit map suitable for high speed variable by generating a PDL specification having a variable data area and a static area, wherein interpretation of the PDL specification the system generates a bitmap of the static data area and adding the bitmap of the static data area to a template bitmap and not adding a bitmap of the variable data area to the template bitmap, and saving the template whereby copies of the template bitmap can be repeatedly accessed to create a plurality of variable data bitmaps.
